Work experience

Full Stack Software Engineer

25. July 2015 - present

Blazing Sun

- Development and prototyping of web applications with a focus on full-stack JavaScript and Rust, PHP and Node.js technologies to ensure optimal performance.
- Design and implementation of APIs using Rust Actix-Web for enhanced speed and scalability.
- Utilization of WebAssembly, vanilla JavaScript, and Web APIs to deliver highly efficient front-end solutions.
- Creation and refinement of Progressive Web Applications (PWA) to provide robust functionality across various devices and platforms.
- Research into advanced web development trends and techniques to maintain technical expertise.
- Establishment of Blazing Sun as an independent initiative for skill development, project experimentation, and innovation in web application architecture.

Senior Full Stack Developer

03. February 2025 - present

Gaming.com | BonusFinder.com

- Led WordPress full stack development, including web application engineering, for scalable and efficient solutions.
- Converted Figma designs into fully functional and scalable WordPress themes and plugins tailored for diverse use cases.
- Designed and implemented advanced caching strategies utilizing Cloudflare Workers to enhance website speed and reliability.
- Enhanced performance optimization with a focus on improving Core Web Vitals metrics for better user experience and SEO results.
- Collaborated cross-functionally to develop robust, scalable solutions aligning with project objectives and technical standards.
- Delivered consistent improvements in web application functionality, ensuring high-performance outcomes across multiple platforms.

Full Stack Web Developer

01. June 2024 - 01. June 2025

Del Systems

- Development and maintenance of WordPress plugins, ensuring seamless integration with Ocamba AdExchange and Ocamba Hood Applications.
- Design and implementation of Shopify Apps to enhance e-commerce solutions, focusing on functionality and user experience improvement.
- Creation of reusable React and Angular libraries to streamline the integration of Ocamba platforms across web applications.
- Assurance of high-quality code by conducting rigorous testing, debugging, and adhering to best practices in software development.
- Collaboration with cross-functional teams to support effective deployment and ongoing maintenance of full-stack web applications.
- Optimization of workflows for greater efficiency and reliability in delivering scalable web solutions.

Full Stack Web Developer

01. February 2024 - 01. June. 2024

OmniStreak

- Developed full-stack web applications with a focus on WordPress theme development using PHP, SQL, JavaScript, HTML, and CSS.
- Created custom WordPress themes utilizing React, JavaScript, and Web Components to enhance functionality and improve user experience.
- Implemented optimized backend solutions to boost performance and streamline database interactions using SQL.
- Designed responsive front-end interfaces ensuring compatibility across a variety of devices and web browsers.

Skills

Overall

- 12 years of Full Stack experience
- Ability to solve complex problems with experience, documentation, stack overflow and with a help of AI

Server Infrastructure

- Docker
- XAMPP

Backend

Frontend

Principles of OOP and MVC

- Encapsulation
- Data Abstraction
- Polymorphism
- Inheritance

JavaScript

- Node.js
- Type safe apps with TypeScript
- Test-driven development with Jest
- Queues/Workers/Jobs & Pub/Sub architecture
- PM2 process manager
- Vite/Webpack/Browserify/Gulp build tools
- Webpack 5 Module Federation
- WebSockets
- Web Components
- React.js
- Redux, MobX & Signal
- Zod validations
- Next.js
- shadcn component library
- Remix.js
- AMP Framework
- PWA
- Web Workers
- Service Workers
- Push Notifications
- Workbox
- WebAuthn
- Asynchronous programming
- ESNext
- Twilio API
- Daily.co API
- Deepgram Voice AI API Platform
- WebRTC
- Canvas API

- Integrated modern web technologies into legacy systems to enhance workflows and support scalability.
- Improved application performance and usability by addressing issues in both front-end and back-end development workflows.

Full Stack Web Developer

25. September 2020 - 01. April 2023.

The Symbol d.o.o

- Development of a web application for remote learning, using Laravel, Twilio, JavaScript, HTML, and CSS to create seamless user experiences.
- Creation of cross-platform mobile applications for iOS and Android utilizing Flutter, ensuring compatibility and performance across devices.
- Implementation of full stack development practices with JavaScript and PHP to deliver robust and scalable systems.
- Collaboration on features that enhanced the functionality and value of the application to meet user needs effectively.
- Integration of communication tools like Twilio to support interactive features within the application.
- Optimization of code structures and system performance to maintain high-quality standards in web and mobile development projects.

Web Developer

2017. - 2019.

Cloud Industry

- Development and implementation of WordPress websites for diverse projects within the cloud industry.
- Creation of custom themes tailored to specific client or project requirements, ensuring unique and responsive designs.
- Design and development of custom plugins to extend WordPress functionality across various applications.
- Optimization of website performance, including load times and accessibility compliance.
- Collaboration with cross-functional teams to integrate web solutions into broader systems and workflows.
- Maintenance and troubleshooting of existing websites, ensuring consistent functionality and user experience over time.

Web Developer

2016. - 2017.

MA Team

- Development and production of WordPress websites tailored to specific client needs.
- Customization and modification of WordPress themes to enhance website functionality and design.
- Development of personalized WordPress plugins and functions to expand website capabilities.
- Implementation of responsive designs ensuring optimal user experience across various devices.
- Collaboration with cross-functional teams to meet project deadlines and deliver high-quality solutions.
- Maintenance, troubleshooting, and updates for existing WordPress sites to ensure performance and security compliance.

IT Technician, Web Developer

2012. - 2015.

Dumil08 Reballing

- Development and implementation of the business website for Dumil08, ensuring functionality and user-friendly design.
- Contribution to technical aspects of website creation, focusing on performance optimization and adherence to design specifications.
- Collaboration with team members to deliver a responsive, scalable, and visually appealing web platform.
- Maintenance and troubleshooting of IT infrastructure to support daily business operations effectively.
- Execution of hardware diagnostics and software installations to enhance system reliability and efficiency.
- Application of best practices in IT support and web development for consistent improvement in operational processes.

- OpenAI API
- Ollama API
- Slack Bolt
- Jira API
- GraphQL
- jQuery

HTML5, CSS3

- Semantic HTML
- Web Vitals
- Responsive HTML templates
- HTML email templates, ZURB Foundation, Bootstrap, Tailwind CSS
- CSS Pre-Processor: Sass
- BEM methodology
- CSS animations and transitions
- Scalable Vector Graphics (SVG)
- Template engines: Smarty, Blade, Liquid, Handlebars

PHP

- Laravel
- Smarty
- Design Restful APIs
 - User authentication system
 - File uploads
 - Image processing
 - Booking System
 - E-Commerce
 - CMS CRUD-s
- Payment integration:
 - Stripe
 - PayPal
 - Kombank Payment Gateway

Data Bases

- SQL
 - MySQL
 - PostgreSQL
 - Relations
 - Transactions
 - Indexes
 - SQL functions
- MongoDB
- Redis
- ORMS
 - Laravel Eloquent
 - Prisma
 - Diesel

Regular Expression

- Match patterns of input validations
- Regex rules and syntax

Postman

- Postman tests
- Postman environments
- Automated collection testing with Postman, Postman CLI, Jenkins
- Postman mock server

Education

Computer Software Engineering

2012 - 2015

Technical College, Kragujevac, Serbia

Software Development (JAVA / C#), Web Development (PHP, JavaScript), Data Base architecture, Information Technology, Computer Architecture, Operating Systems, Safety with Information Technology, Management of Information System, E-Commerce.

Electrical and Electronics Engineering

2002 - 2006

High Electro Technical School "Jovan Žujović" - Gornji Milanovac

Basics of Electro Technical science, electronic science, electric motors, electric measuring instruments, elevators, audio and light calculations.

Language Skills

Native language: **Serbian**

Other languages: **English**

Social Skills

I am able to work in a team with people of a multicultural background, I am communicative, sociable, obedient, user-friendly, quick and responsible.

Organizational Skills

In my work I am energetic with mathematical precision, reliable, professional and team-minded. In a team I take initiative to impart knowledge where needed but am also easy in accepting advices and quickly applying them. Team problems I see as my own responsibility as well as each team mistake. I am a fast learner and very flexible in new and unpredictable situations. Also I am a very communicative person and I happily and easily interact with other people. I'm always interested to learn new ways of working and actively participate in the business organization where I work. I take initiative and respond to problems in a timely fashion in the implementation of work tasks, even when this is not specified in detailed methods and procedures. Let me finish off by saying I have a high desire for professional success and I am highly motivated by successful performance of work organizations in which I work.

Art Skills

I am creative and artistic minded person. I am playing five different musical instruments and have a great love of music, poetry, literature, painting, movies, sport and gaming.

Ongoing Projects

Title: BonusFinder

Description: **BonusFinder.com** is an affiliate marketing website that aggregates and displays a wide range of online casino offers, including free spins, no deposit bonuses, and deposit bonuses. The platform collects these promotions from various licensed casinos and presents them in an easy-to-navigate tabular format, helping users quickly compare and choose the best deals available.

Role: Full stack engineering and maintaining WordPress plugins and themes for the BonusFinder project. Working on caching and create strategy for the cache content of the webpage with the CloudFlare Workers. Working on headless Next.js project that will replace regular WordPress frontend.

Url: <https://www.bonusfinder.com/>

Technologies: Wordpress, PHP, Smarty, SQL, JavaScript, HTML, CSS, Nex.js, React.js

Title: TicketBuddy - Create Jira Tickets from Slack Instantly

Description: Say goodbye to context switching and manual ticket creation. This internal Slack app allows you to quickly create Jira tickets without ever leaving your Slack workspace. With a simple `/ticket` command, you can open a guided modal powered by **OpenAI** (GPT-4o mini) to streamline the process.

Role: Full stack engineering of slack app with node.js and TypeScript. Application uses Drizzle ORM and with a help of a Slack Bold app is rendering modals inside of the slack directly. With a help of a Jira Client app is consuming your jira projects real data. With a help of a trained OpenAI API & Assistant we can create body message for the ticket more easily.

Technologies: Node.js, TypeScript, Drizzle ORM, @slack/bold, Jira Client, Open Ai Assistant

Git

- GitHub for Desktop/ Sourcetree
- Git rules and syntax
- Understanding of Git Object model Blob-Tree-Commit-Tag
- GitHub Desktop, Source Three

Wordpress

- Wordpress as backend framework
- Theme Development
- Theme Customization API
- Custom Gutenberg Blocks & ACF
- Plugin Development
- Woocommerce
- Wordpress advanced roles, taxonomies
- Wordpress SPA
- Wordpres Headless with Next.js
- Yoast configurations

Prestashop & thirty bees

- Theme Development
- Module Development
- Integration of Kombank online payment gateway to the prestashop

Shopify

- Shopify plus shop configuration
- UPS integration/configurations
- Consuming Shopify API on third party
- Theme development
- App development
- Remix.js & Polaris
- Shopify web hooks
- Shopify app deployment

SEO

- Page speed optimization
- On page SEO
- Schema data structures
- Google, Yandex, Bing webmaster consoles settings

Linux

- Web server configuration
- Database server configuration
- Supervisor configuration
- NGINX proxy server
- OpenSSL
- Bash script

Python

- Django Rest API
- IoT with PyParallel
- OpenCv
- Selenium WebDriver Automatizations
- ftplib
- watchdog

Previous Projects

Title: Empower Nation Medical Video Chat Room

Description: Empower Nation is medical video chat room. It is a full stack JavaScript application. Application uses Daily.co for audio and video signaling. Inside of video call, with a help of Deepgram transcripts are collected. Later transcripts are sent to the OpenAI and Ollama Assistants for receiving suggestions about treatment.

Role: Full stack engineering. Data base architecture, API architecture, Frontend architecture.

Url: <https://app.empowernation.com>

Technologies: Node.js, TypeScript, Prisma, SQL, React.js, SCSS, Vite

Title: Okamba

Description: The complete suite of enterprise management applications for **Ad - serving, Push messaging** and **Hood Analytics** integrated with the largest advertising networks in the industry.

Role: Developing and maintaining WordPress plugin for integration, Shopify App For integration of Ocamba AdExchange and Ocamba Hood Applications.

Url: <https://ocamba.com/>

Technologies: Wordpress, PHP, SQL, JavaScript, HTML, CSS, Shopify, Remix.js, Liquid

Title: Hood Engage Shopify App

Description: Hood Engage is abandoned cart application Shopify app. When cart is abandoned, user will receive Web Push Notification with informations about abandoned cart. Application is using JavaScript fetch and web hooks to send data to server. Later, info received over web hooks and fetch requests is processed with a cron job,

Url: <https://apps.shopify.com/hood-engage>

Technologies: Shopify, Liquid, HTML, Remix.js, Shopify Polaris, Shopify API, Vite

Title: Hood Engage WordPress Plugin

Description: Hood Engage simplifies driving traffic to your website, connecting with visitors, and creating a loyal subscriber base. Implement and use advanced Hood Engage features directly from your WP dashboard in just a few clicks.

Url: <https://wordpress.org/plugins/ocamba-hood/>

Technologies: Wordpress, PHP, SQL, JavaScript, HTML, SCSS, Vite

Title: Performance Golf

Description: Performance Golf is web portal where you can buy golf accessories and buy golf courses with the best golf coaches in the world.

Url: <https://www.performancegolf.com/>

Technologies: WordPress, Woocommerce, PHP, SQL, JavaScript, HTML, CSS

Title: Performance Golf – Members Area

Description: Performance Golf – Members Area is platform for accessing courses from world class golf coaches.

Url: <https://members.performancegolf.com/>

Technologies: WordPress, React, PHP, SQL, JavaScript, HTML, CSS

Title: Live from Montreux website

Description: The **Live from Montreux** website is a WordPress-based platform that serves as the presentation layer for the *Live from Montreux* store. The site showcases a series of books that chronicle the rich history of the Montreux Jazz Festival, spanning from 1967 to 2013. Each volume offers a unique collection of stories, memories, and behind-the-scenes insights about the iconic festival and its legendary performers. One of the featured books, *Claude Nobs*, honors the founder of the festival and captures his pivotal role in shaping the festival's success and legacy. This website serves as both an informative resource and a shop for fans and collectors who want to immerse themselves in the vibrant history of Montreux's musical journey.

Url: <https://livefrommontreux.com>

Technologies: WordPress, PHP, JavaScript, CSS, HTML, CSS, Adobe Photoshop CS6, Adobe Illustrator CS6

Rust

- Deisel ORM
- Actix-Web Rest API
- WebAssembly

JAVA

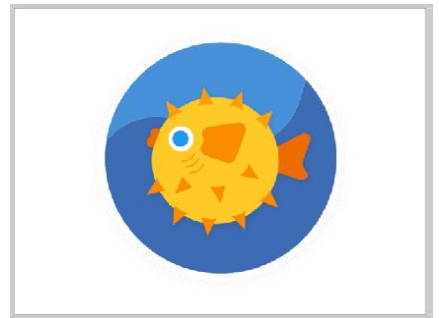

- Android Studio
- Native android app with WebView

C#

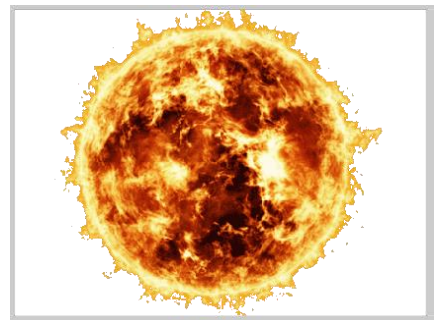

- Chat server & client

Portfolio

Google Developer Profile

Blazing Sun

Title: Live from Montreux store

Description: Live from Montreux store is Shopify web application with cause of selling book volume about Montreux Jazz Festival from (1967 – 2013).

Url: <https://livefrommontreux.store>

Technologies: Shopify, Liquid, HTML, CSS, JavaScript, Shopify API

Title: Friends of Claude

Description: Friends of Claude is closed application for writing testimonials about Live from Montreux book.

Url: <https://friendsofclaudio.com>

Technologies: TypeScript, Node.js, JavaScript, MongoDB, PostgreSQL, Redis, BullMQ

Title: Talkila

Description: Talkila App

Url: <https://www.talkila.com/>

Technologies: PHP, Laravel, Node.js, Webpack/Browserify/Gulp, JavaScript, HTML, Zurb Foundation, SCSS, CSS, Twilio, WebRTC, WebSockets

Title: Happy Car

Description: Happy Car – Rent a Car Web Site

Url: <https://www.happycar.de/>

Technologies: JavaScript, Node.js, Webpack/Browserify/Gulp, React.js, HTML, SCSS, CSS, PHP, Laravel

Title: Blazing Sun HTTP2 Node.js server for uploading files to Google Drive

Description: Blazing Sun Google Drive file uploader & HTTP2 Chat

GitHub: <https://github.com/donmilorad87/blazingsun-http2-google-file-uploader-and-chat/>

Technologies: JavaScript, Node.js, Cookie, Meme, Google Drive Api, HTML, CSS

Title: Blazing Sun Rust API

Description: Blazing Sun Rust API

GitHub: <https://github.com/donmilorad87/blazingsun-rust-api/>

Technologies: Rust, Actix-Web

Title: Blazing Sun Multiplayer Game

Description: Blazing Sun small unfinished multiplayer turn based game

GitHub: <https://github.com/donmilorad87/blazingsun-multiplayer-game>

Technologies: JavaScript, Node.js, Express, Socket.io, Lodash, HTML, CSS

Title: Blazing Sun Chat

Description: Blazing Sun Node.js WebSocket Chat

GitHub: <https://github.com/donmilorad87/blazingsun-node-chat>

Technologies: JavaScript, Node.js, Express, Socket.io, HTML, CSS

Title: Blazing Sun MERN stack

Description: **Blazing Sun** is a MERN stack boilerplate with a basic React frontend. It features user authentication, profile editing, and essential backend functionalities like middlewares, route throttlers, and Express validation. This setup provides a solid foundation for building secure, scalable applications with minimal setup, allowing developers to focus on building features instead of boilerplate code. It's an ideal starting point for both new projects and quick prototypes.

GitHub: client – <https://github.com/donmilorad87/blazingsun-mern-client>
